The major assets in the life of an enterprise are its customers and the services provided to them. International telecommunication giants, renowned retail companies as well as public institutions trust in the reliability of our solutions as well as in the competence and experience of our software specialists. What is more, NTS cooperates with globally renowned hardware manufacturers, system houses and service organisations thus providing our customers with premium services.

the refe

WHY DO SO MANY MAJOR TELECOM, RETAIL & SERVICE COMPANIES HAVE THREE LETTERS IN COMMON?

Perhaps because NTS solutions stand out through highest quality as well as schedule and budget compliance.

Probably also because NTSwincash is a customisable future-proof integration solution finely interconnecting all service, sales and management functions within a single application.

Definitely, the high level of commitment of NTS software experts, trainers and customer service assistants which makes ever more companies choose NTS!

MARKETING IMPETUS

With NTSwincash your sales & marketing department has a powerful instrument for comfortable control of all promotional activities from product promotions to trend analyses. The system delivers all information for efficient control of running campaigns in real-time, so you can so set your own targeted focus and immediately react to your competitors' promotions.

PROFESSIONAL CUSTOMER SERVICE

As single point of service, NTSwincash offers your branch staff full functionality for comprehensive customer assistance. Seamless integration of third party systems such as CRM, billing, as well as fully integrated repairs processing, and mobile assistances terminals are a guarantee of flawless customer service.

EFFICIENT CONTROLLING

The NTSwincash controlling module enables seamless management of all shop activities. All operations and transaction data can be centrally traced and analysed. NTSwincash offers management departments a multitude of standard reports as well as the ability to create your own special focus analyses.

SIMPLIFIED LOGISTICS

With NTSwincash logistics you can manage the entire goods flows within your branch network. Complex processes such as goods allocation, transfers between branches as well as stocktaking are considerably simplified with wincash logistics. Seamless tracking of an article from its initial posting through allocation all the way to sales and returns ensures maximised security and protection.

EXACT ACCOUNTING

Your accounting department always has an insight into the sales transactions of all branches. NTSwincash has interfaces to external accounting systems, movement data are automatically prepared for transfer to the background systems (initial account assignment).

REPAIRS MANAGEMENT

The web based NTSwincash RepairManager optimises control and tracking of your repairs orders (customers orders, internal repairs orders). The module forms the hub between your branches, service centres and of course your clients who can comfortably query the status of their repair orders from home.

SEAMLESS INTEGRATION

NTSwincash can be used as a self-contained all-in-one solution also offering interfaces for smooth integration into existing system environments. Our NTS specialists provide professional integration of the NTSwincash retail solution into your existing ERP, CRM and financial systems.

NTS WINCASH ASP

With this new product line NTSwincash can also be deployed by both small and medium companies. The entire system is managed at NTS; for you this means no investment risks – no expensive server hardware or system support expenses – just monthly fees instead of the purchase of licenses.

SOFTWARE. HARDWARE. EVERYWHERE.

We accompany you through the entire system integration process beginning with the initial needs analysis to support of your NTSwincash solution in running operation, and all this with competent and qualified system analysts, integration specialists and trainers.

What we can
do for you

NTS - the new spirit of software solutions

the portfolio

CONSULTING

Your personal NTS project assistant is available during the entire course of the project and brings in their professional expertise from other successful projects already during the planning phase.

BUSINESS PROCESS DESIGN

Together we analyse and optimise all business processes and then design a software configuration perfectly tuned to your requirements.

CUSTOMER SPECIFIC DEVELOPMENTS

Our standard modules allow us to offer solutions optimally addressing individual requirements. The NTS software experts are also specialised in requirements going beyond the functional scope of our software.

SYSTEM INTEGRATION

NTS software solutions can be seamlessly integrated into the existing IT structure using state-of-the-art technologies (EAI, SOA) providing completely future-proof investment.

ROLLOUT & TRAINING

We design efficient and cost efficient training and rollout plans in accordance with your outline conditions. Pedagogically qualified trainers provide competent coaching and consulting for your administrators and users.

CUSTOMER SERVICE & SOFTWARE MAINTENANCE

NTS customer service provides around the clock assistance; we can take on complete user support, or just provide assistance to your administrator teams. Our maintenance service guarantees the long-term availability of your NTSwincash solution in constantly evolving system environments.

HARDWARE PROVISION & CONSULTING

NTS assembles a perfectly tuned hardware package; furthermore, our global partner network (IBM, Epson, TIPRO, Wincor Nixdorf...) ensures smooth and comprehensive introduction and support of your systems.

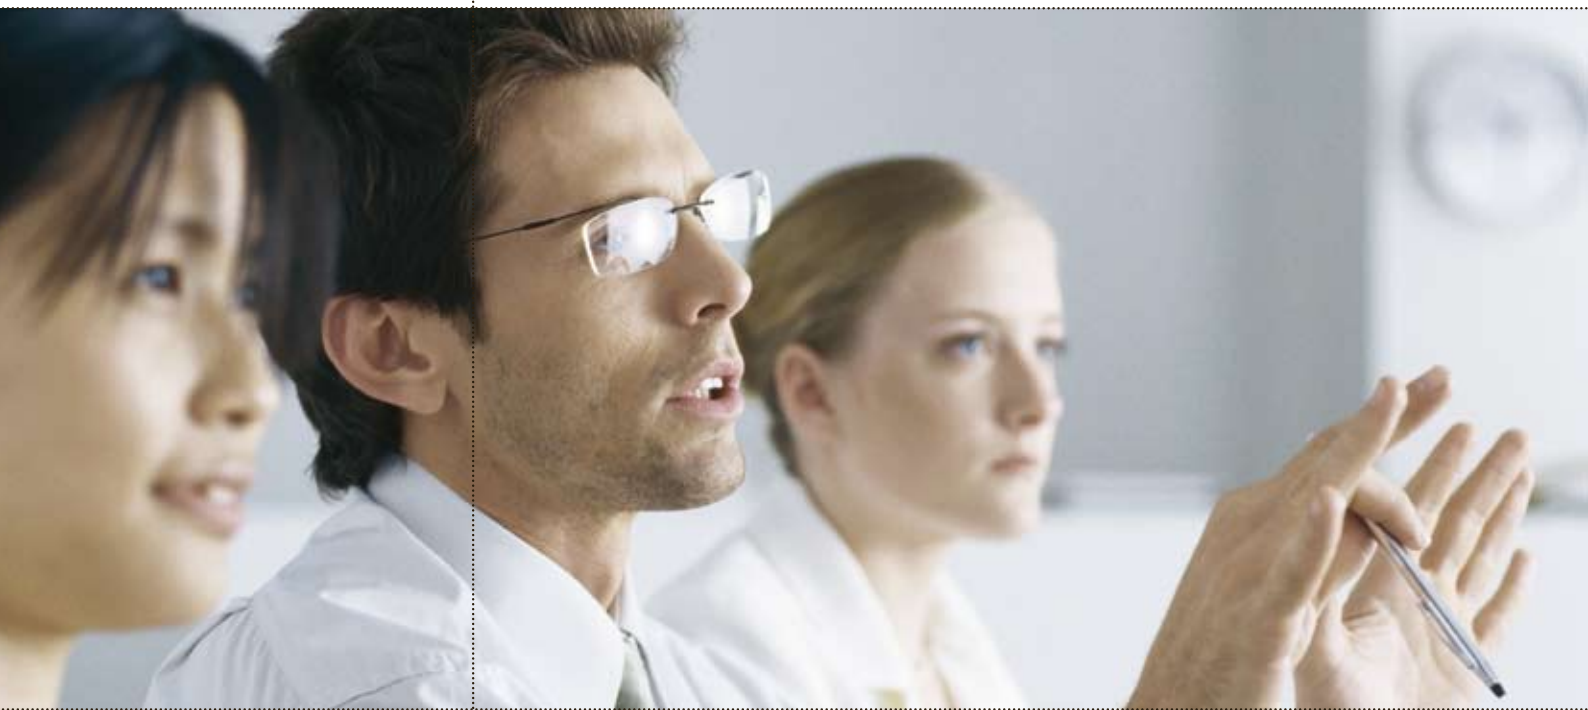

Prototypical course
of a project

HOW IT WORKS

New spirit means listening and incorporating the new so that we understand what you really need since no one knows your company better than you yourself. In the analysis workshop you can test our solutions in advance in respect of your individual requirements. We draw up a precise offer with guaranteed delivery date based on this workshop or your list of requirements.

Technical expertise and consulting efficacy form the foundation for selection of your optimally tailored system configuration, interface technology and hardware components.

Service and more is the prime directive in training and assistance of your administrators and users. Together we develop the right rollout and training concept. Our service agreement allows you to continuously benefit from the latest developments of our software.

the philosoph

QUALITY NOT QUANTITY. PEOPLE COUNT.

We take assistance
very personally

Decisive for the success of a project are the people behind it. Professional and personal customer assistance is therefore the most important principle of our corporate philosophy.

This is also true for the professional expertise and experience of our specialists, flowing into new projects to the benefit of our customers.

In the final calculation, it is also the high degree of flexibility of our software which allows us to quickly respond to the needs of our customers. Every NTSwincash solution is tailored to match individual requirements and precisely tuned to your needs, giving you more time and capacity to focus on your core business competencies.
