What our customers
have in common

HIGH ASSISTANCE INTENSITY

The sale of high quality technical lifestyle products and fashion and sports articles demands a high degree of background information for the sales assistant.

EXTENSIVE BRANCH STRUCTURES

Many of our customers are global players with various, sometimes semi-autonomous sales and distribution regions.

HIGH DEGREE OF INTEGRATION

We see our core competence in integrating our solutions into existing ERP, financial and ORM systems.

VARIOUS SALES & DISTRIBUTION CHANNELS

Branches, franchisers, web shop and corporate channel must all be comfortably served through a single solution.

HIGH SERVICE COMPONENT

Contracts, insurance and services are also offered beyond basic sales processing.

COMPLEX STOCK MANAGEMENT

Permanent availability of goods is a significant component of flawless customer service.

PROMOTIONS

Competition demands a system which enables equally fast implementation of new campaigns and reaction to your competitors' promotions.

HIGH ABUSE SECURITY

Trading in high-value goods and vouchers makes maximised security of the sales systems against abusive activities into an absolute must.

retailso

ALL THIS MAKES NTS WINCASH THE IDEAL SOLUTION FOR TELCOS, CONSUMER ELECTRO- NICS, SPORTS AND FASHION.

NTSwincash is specifically aimed at these industries in its conception and functionality. NTS New Technology Systems adapts its products and services to the requirements of your company.

Therefore NTSwincash offers the flexibility to include new special requirements into the functional scope in a very short time, with the effect that you not only benefit from the experience gained from numerous successful projects, but with NTSwincash you receive a solution that is truly satisfying the requirements of your sales and management departments.

electronics

MODULES FOR YOUR BRANCHES

wincash sales

As a single point of service for the sales assistant wincash Sales delivers comprehensive information for professional customer assistance, including all-embracing assistance functions, information on customers and their buying behaviour as well as online call up of data from external systems (e.g. billing, activation...).

wincash register

The POS module supports, besides all common forms of payment, also modern forms such as payment with mobile phone.

wincash mobile

The mobile edition of wincash Sales not only offers all customer assistance and sales processing functions directly at the product, also the posting of delivered goods as well as the mobile input of stocktake data in the warehouse ensures user friendly and modern inventory management.

wincash eLoading

The special module for the Telco branch enables secure sales of electronic activation codes instead of abuse susceptible and cost intensive prepaid cards.

wincash branch modules
are deployed directly in
the individual branches
for optimal customer
assistance

wincash activation

Integration of common activation systems with this interface module accelerates the activation of telephone contracts directly at the POS.

wincash repair manager

With the wincash RepairManager you control your inventory and customer repairs from order creation in the branches through assignment of the service centre to handover of the repaired goods.

LOGISTIC MODULE
MANAGEMENT MODULE

MODULES FOR YOUR MANAGEMENT

NTSwincash central backoffice

The core of the NTSwincash Retail Management System for management of all your sales and distribution channels and control of all branches, master data and campaigns.

NTSwincash central logistics

The central logistics module for control of all goods movements in the entire branch network.

NTSwincash m . i . s .

The NTSwincash management information system delivers a clear overview of all relevant management information for validation of running campaigns, specified targets, sales cycles.

NTSwincash reporter

NTSwincash Reporter, as a complement to wincash MIS offers the ability to draft tailored, special focus analyses for customers.

NTSwincash journal viewer

The perfect tool for efficient and cost effective user support, Journal Viewer enables seamless monitoring of all activities in your branches and forms the basis of optimal assistance of all users.

The NTSwincash management modules are available to the individual departments in the head office for efficient controlling as well as optimised and efficient organisation

NTS - the new spirit of software solutions

retail solutions

wincash replicator

For customers who value maximised system security and do not want to rely on a single central database. Wincash Replicator regulates the data synchronisation between the head office and the branch databases, whether scheduled or after each transaction as a quasi "online" solution.

wincash distributor

Predefined central release management not only means that you have a uniform version across all branches, but also leads to a significant reduction of rollout costs.

wincash event viewer

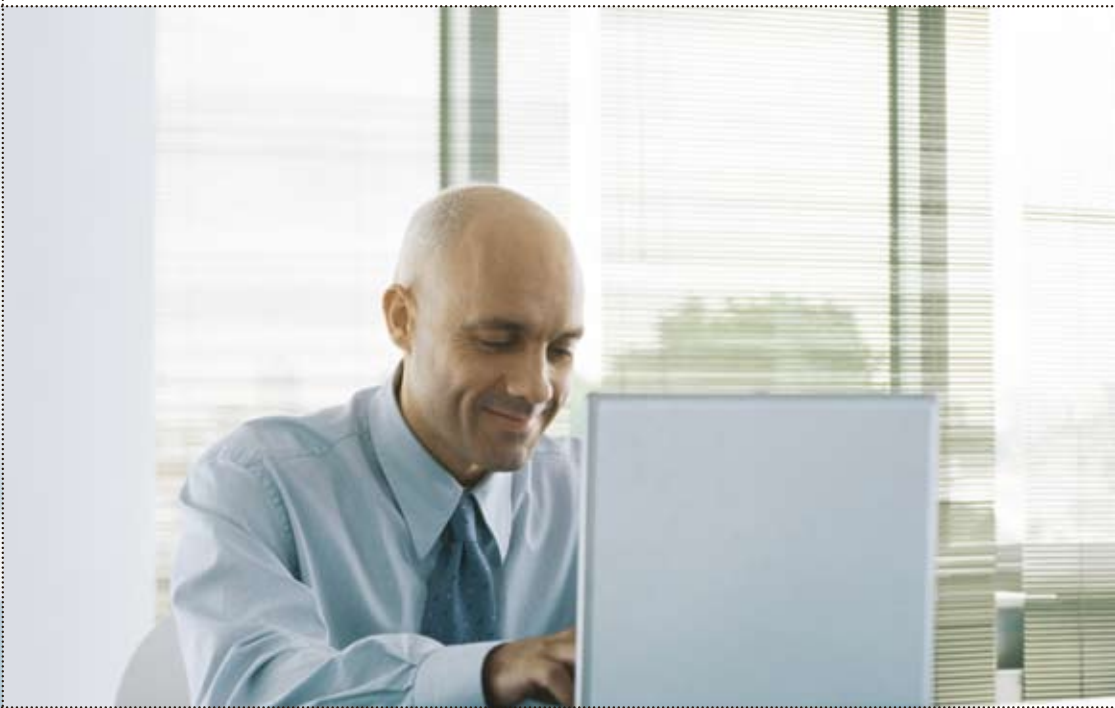

This early warning system informs you of malfunctions by SMS or e-mail before they become acute (e.g. diminishing disk space). A multitude of events are available (e.g. locking of user passwords through false login), to keep you always up to date.

wincash translator

NTSwincash is not only well suited for international companies through multilingualism and multi-currency capability, but with wincash Translator you can use your own company terminology in the wincash system and operate the solution in your corporate language.

wincash commissions

This module manages all your supplier, branch and staff commissions.
