

REVOLUTIONARY IN FUNCTION AND DESIGN: THE NEW RETAIL MANAGEMENT SOFTWARE NTS WINCASH 7.20

The new generation of NTSwincash, a POS and retail management software is here. Developed with Java, based on modern SOA architecture, this new solution impresses with its contemporary design, the multiplicity of new functions and the possible use in the touchscreen mode.

With NTSwincash 7.20 another high end retail management system has been developed by the software engineers of NTS New Technology Systems. The new version had to fulfill the requirements of an easy-to-use POS software for an ERP system as well as a retail management system. The highest possible comfort for the customer has been the number one priority. NTSwincash 7.20 is a modular all-in-one solution ranging from a point of sale module to a complete retail management system including the control and monitoring of the distribution channels, promotions, goods movements and repair orders.

State-of-the-art technology with style

The use of state-of-the-art SOA architecture and Java technology allows new integration and application possibilities. The new version of NTSwincash 7.20 can also be used in the touchscreen mode. The platform independent central enterprise resource planning system complies with all logistics standards of the 21st century due to the use of Java technology for the central inventory and the whole network of branch offices.

The GUI (Graphical User Interface) and the usability are other important features for software in general. Thus NTSwincash 7.20 shines through its appealing, modern design as well as through its high user friendliness (see screenshot). Nowadays corporate branding is an important keyword for major companies and the new software of NTS New Technology Systems scores with a user interface that is arbitrarily adaptable to the Corporate Identity of the customer.

Success through teamwork

NTS New Technology System owes its success to the motivated and highly qualified employees. "As we raised the bar for the development of NTSwincash 7.20 very high, it is only thanks to the élan and ideas of the entire team that we were able to make this leap," said Markus Dunzinger, NTS development manager.
