

NTSwincash sales & register facilitates national and international payments and supports manifold means of payments

Wilhering, Austria – reliable and optimally organised business processes at the POS are a major prerequisite of success. This becomes a challenge for companies with interregional and international branch networks due to the manifold payment methods, legal stipulations and hardware components involved. Within their portfolio the European market leader in POS and retail management solutions, NTS New Technology Systems offers NTSwincash register, an efficient solution ensuring smooth payment transactions.

“In our solution flexible payment management is the foundation for later adjustments to keep up with technical advances” Günter Schrammel, CEO of NTS New Technology Systems GmbH (www.ntswincash.com) emphasising one of the decisive advantages of NTSwincash sales & register. In addition to all typical payments methods such as cash, vouchers, credit or cash cards it also supports the latest methods of payment such as payment via mobile phone.

“Moreover, NTSwincash sales & register informs you of exceeded or undercut stock limits, minimum or maximum amounts and even allows combination of different means of payment” says the NTS CEO describing the manifold functionalities. At the same time security remains in focus – simultaneous verification of voucher serial numbers and automatic credit card validation prevent any abuse.

“NTSwincash register naturally supports multiple currencies and is compatible with all hardware components from prevalent vendors” continues Schrammel. If desired, it can be even deployed without any POS peripherals. “National stipulations regarding turnover registration and documentation in memoria fiscale or fiscal printers are essential for internationally operating companies and ensure compliance with legal stipulations. NTS wincash register easily handles even the more stringent financial stipulations as for instance in Italy, Brazil or Croatia” emphasises Schrammel, convinced of the innovative character of this module.
