

Slovenian Mobile Operator Si.mobil returns to proven NTSwincash Solutions

Ljubljana / Vienna - Si.mobil, the Slovenian Mobile subsidiary of the Mobilkom Austria Group (MAG), has returned to the proven NTSwincash system after almost three years. The comprehensive solution bundle from European Market leaders in Point of Service and Retail Management solutions, NTS New Technology Systems encompasses a wide range of efficient tools for sales, distribution and logistics from an easy-to-use POS solution as Front End for external ERP systems up to a comprehensive Retail Management System.

The Austrian software specialist offers solutions supporting sales assistance and simplifying shop control across branch networks tailored to the mobile telephony sector. With around 500,000 customers and 40 POS, Si.mobil may well be a relatively small NTS customer, but has a strong partner in the form of the Mobilkom Austria Group, who follows a consistent strategy of using the same POS and retail management software at all locations, a fact greatly simplifying reintroduction of the proven NTS system at Si.mobil.

Despite location-specific requirements due to Slovenian Financial and fiscal regulations, NTS was able to guarantee a smooth process thanks to experience from other countries where MAG had already used the solutions from the Austrian specialists. The majority of MAG companies now operate the same NTSwincash versions and the process of introducing the CITRIX application server solution has already started, allowing the applications to be centrally operated and controlled.

“We see a common future with the Mobilkom Austria Group as entirely positive, and would be pleased to continue to accompany the strong partner of Si.mobil in their expansion,” summarised Bernd Steinwender, project manager at New Technology Systems GmbH.
