

Retail Management System to Go: NTS Changes to New Server Housing Partner SILVER SERVER

Wilhering, Austria; the announced change over of NTS New Technology Systems GmbH to a new server housing partner ran smoothly last weekend according to the European market leader. With the successful upgrade to the SILVER SERVER provider, NTS can now offer users of their "your.NTSwincash" software as a service (SaaS) solution maximum bandwidth capacity and reliability thanks to redundant storage and network design. "Our extensive preparations paid off completely with a smooth change over, from now on there is no longer any single point of failure in your.NTSwincash" stated Günther Schrammel, CEO der NTS New Technology Systems GmbH (www.ntswincash.com).

The comprehensive POS and retail management suite "NTSwincash" allows enterprises to efficiently process all product, invoicing and logistic information. Enabling management not only targeted intervention in running processes, but also presents staff at the point of sale with comprehensive information on products, dispatching options and completed sales transactions.

The major difference between "regular" operation and the "leased" SaaS variant "your.NTSwincash" is online access to a fully preconfigured retail management system requiring no administrative effort. "Our customers only need to pay a fixed monthly rate replacing any initial software, hardware, licensing or administrative investment costs" underlines Schrämmel. International telco giants, such as Vodafone or T-Mobile, rely on the comprehensive branch and POS solution from NTS in their customer and sales organisation. With the SaaS concept, small and medium companies also have access to the lucrative advantages of a comprehensive retail management system.
